

PAN AUGER

NEW ITEM!

*For use in cleaning
large rocks from holes.*

Pan Auger

The Pan Auger is a shallow auger used in retrieving large rock and boulders out of a hole. There are no teeth or pilot bits.

A 4" hardfaced "flight guard" is applied to the flight in order to keep items from rolling off the sides.

There is one $\frac{3}{4}$ " wrap 1" thick flight which is $1\frac{1}{2}$ " smaller than the cut or hole size.

Please call Pengo Sales for more details.
