2.36" [60mm]	662277	2
2.56" [65mm]	662278	2
2.76" [70mm]	662279	2
3.15" [80mm]	662280	2
3.54" [90mm]	662281	2

COMPACT & ADJUSTABLE

Pengo's new patented EOS (End of Stick) auger drive mount is fully adjustable to fit multiple excavator makes and models.

- Adjustable ear widths between 4.5" to 17"
- Locking hardware adjustment takes only minutes
- Removable bushings make adapting to multiple OEM pins simple

Common bushing sizes are shown in the chart on the left. The EOS mount is available in two models, 8K and 16K. The EOS-16K mount is designed for drive units developing 16,000 ft/lbs of torque. For smaller torque requirements, see the 8K model.
