CUT DIAMETER

True Cut diameter is equal to the auger diameter.

DRILLING SOIL CONDITIONS:

FACT: The Pengo® PDR is great for use in undesirable rocky conditions and in areas with minimum ground clearance.

Pengo® True Cut PDR augers are made with thick, heat-treated cast alloy heads and Pengo's own STRATA® SR-100 conical teeth. The cast heat treated head provides superior wear and performance compared to normal fabricated augers. In addition the cast head is field repairable with standard welding techniques, utilizing low hydrogen welding rods and no pre- or post-heating requirement.
