

## UTILITY AUGERS

88", 102" and 104" OAL

### CONNECTIONS

### AUGER DIAMETERS

### CUT DIAMETER

Cut diameter is 1 1/2" larger than auger diameter.

### DRILLING SOIL CONDITIONS:

Originally a Pengo patent, our MD auger line is the most widely used utility auger in the world. Recent enhancements include a recessed hub connection for added stability, seam welds for increased life cycle, high yield center shaft walls and a patent pending flight stabilizer gusset. Offered in a wide variety of flight lengths and head options, Pengo can provide a customized auger specifically for your drilling applications.

Recessed Socket connection provides added stability

**FACT:** In the Fall of 2015 the Pengo Utility auger received some improved features making this the "go-to" utility auger.

Patent Pending Flight Stabilizer Gusset

Seam Welds for Increased Life-Cycle

5/16" Flight Thickness

High Yield 4" OD x 3/8" Wall Center Shaft

### AVAILABLE OPTIONS:

1. **Standard Dirt (SHOWN)**  
FH-205 Pilot, 1851 and 1652 Fas-N-Lok® Teeth
2. **Standard Dirt**  
P-1650 Pilot, 1851 and 1652 Fas-N-Lok® Teeth
3. **Standard Dirt**  
TF-600 Pilot, 1851 and 1652 Fas-N-Lok® Teeth
4. **Carbide**  
FH-205C Pilot, 1658 and 1656 Fas-N-Lok® Teeth
5. **Carbide**  
P-1656 Pilot, 1658 and 1656 Fas-N-Lok® Teeth
6. **Rock**  
RCP-6.5 Pilot, SL-02 Conical Teeth
